DIBBS Delivery Order Fulfillment

Shipping DIBBS orders with DD-Formstation is easy:

1. Click "In-Box". DD-Formstation automatically imports all new orders from DIBBS and converts them to Receiving Reports (DD250).

2. Make any desired edits to the Receiving Report with the full-featured editor built in to DD-Formstation.

3. Click "WAWF". DD-Formstation uploads your Receiving Report and Invoice to WAWF. Print paper copies for internal coordination or historical records.

4. Click "Barcodes". DD-Formstation creates your desired barcode labels in Std-Barc software, ready for you to edit or print, including RFID and UID labels.

5. Upload complete RFID and UID data to WAWF in minutes with about 6 mouse clicks, regardless of how many containers or units you ship.

No more keying data into WAWF.

No more keying data into software to print labels.

DD-Formstation can create dozens of other forms required by DoD suppliers. Call for a list or visit our website.

DD-Formstation's robust form editor includes address and parts database to reduce redundant data entry and on-screen wizards to further automate data edits.

Pricing:

- DIBBS software bundle is $1,975. VAN services cost $150 to set up and only $398 per year.
- Pricing includes unlimited phone and email support and unrestricted software upgrades for the entire year.
