

**UID, RFID AND WAWF ARE
THREE SEPARATE MANDATES WITH OVERLAPPING REQUIREMENTS.**

**MIL-PAC TECHNOLOGY'S INTEGRATED SOFTWARE MODULES
CAN BE USED SEPARATELY OR COMBINED TO
CREATE FLEXIBLE & POWERFUL SOLUTIONS.**

UID REGISTRATION — Register new acquisition UIDs via WAWF or direct to the UID Registry.

UID CONTAINER LABELS — Print Mil-Std 129P(4)-compliant container labels with new UID 2D barcode.

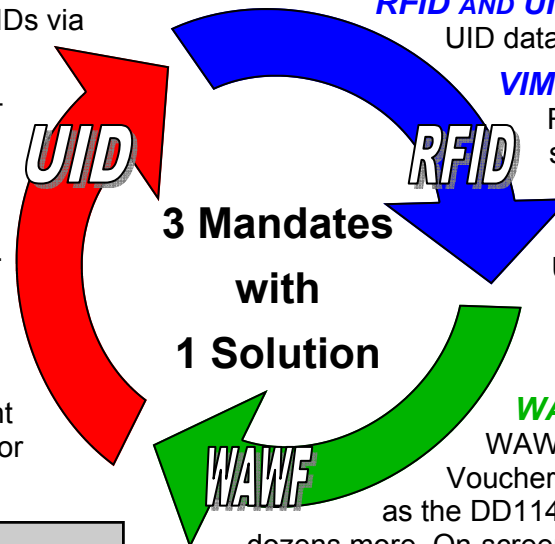

UID AND RFID — Automatically generate WAWF Advance Shipment Notice with UID and RFID data. *No wasted data entry!*

SCAN/IMPORT DATA — Scan or import UIDs to prevent data errors and reduce labor.

UID PART MARKING — Print Mil-Std 130-compliant UID labels for part marking, using thermal transfer or laser printers.

OTHER FEATURES:

- **MIL-STD 129P(4) LABELS** — Print all required container and shipping labels—*over 60 label formats!*
- **AIA PARTNER TO PRIME TRANSACTIONS** — Automatically generate AIA Partner to Prime Transactions.
- **CONTRACT SHIPMENT MANAGEMENT** — Manage multiple Shipments for a Contract. Print Contract Status reports.

RFID TAGS — Easily print RFID tags either as individual tags or as part of Mil-Std 129P(4) container labels like Military Shipping Labels (MSL) and Exterior Container Labels.

RFID ADVANCE SHIPMENT NOTICE — Automatically generate and submit RFID data to WAWF. Automatically associate cases to pallets. *No wasted data entry!*

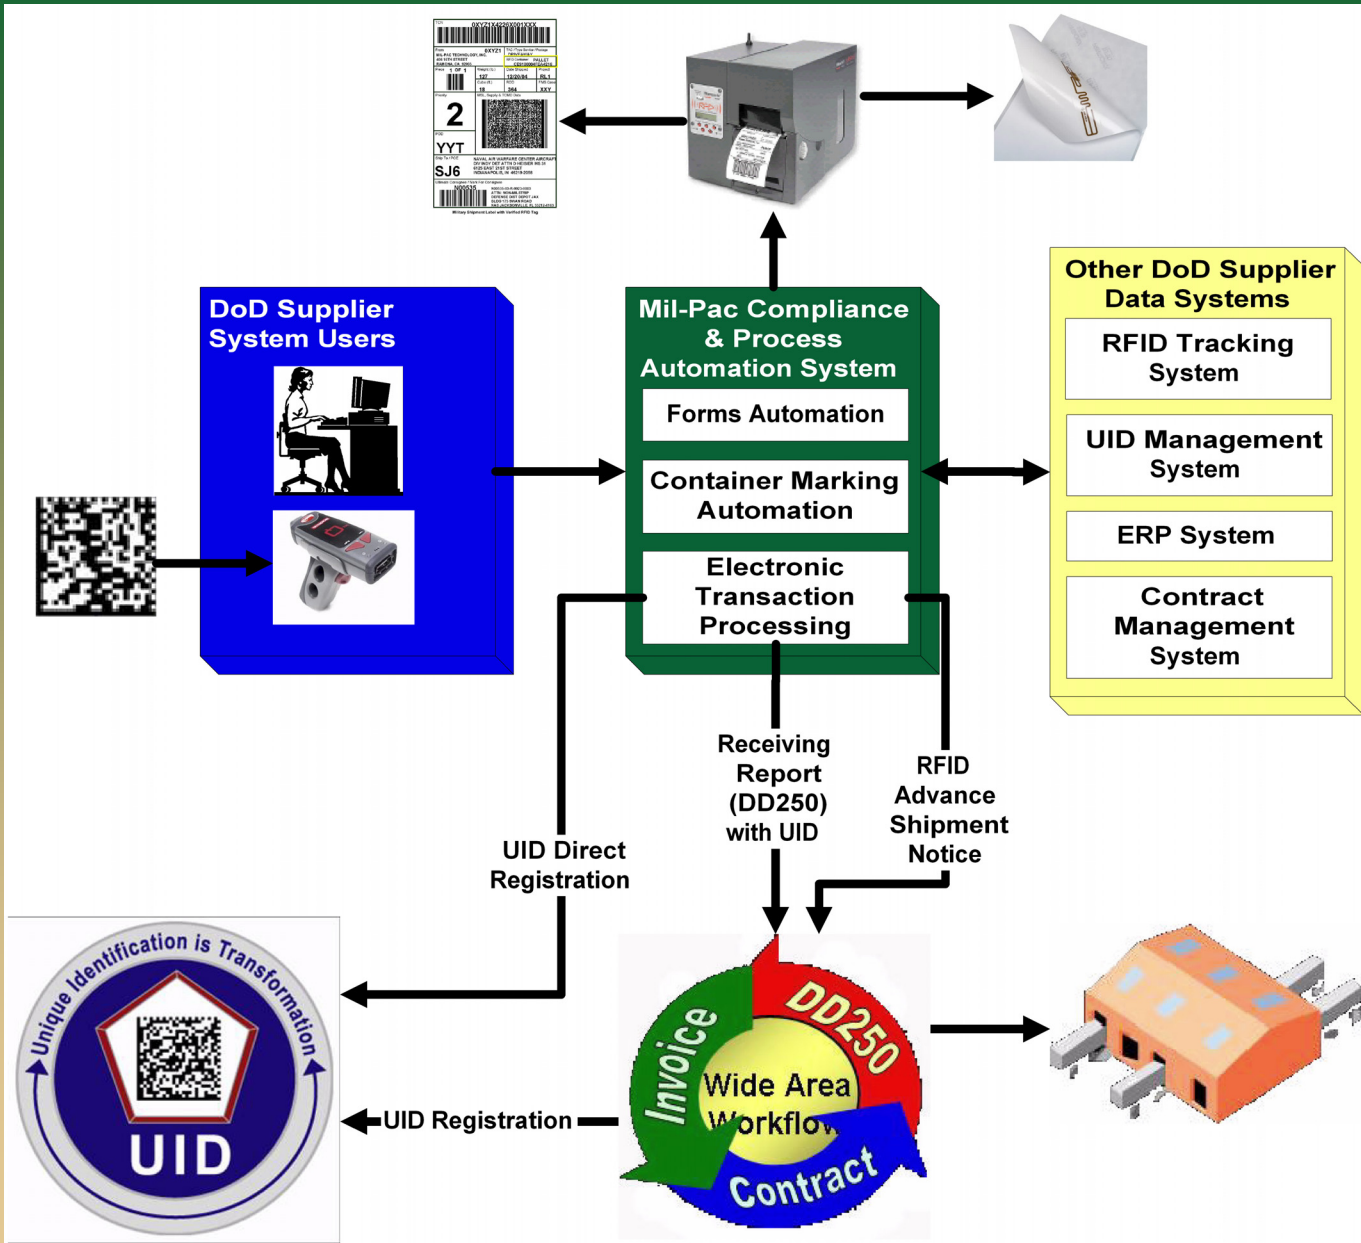

RFID AND UID — Automatically associate RFID tag data with UID data for integrated data submission to WAWF.

VIM-ASAP — Automatically generate and submit RFID data to VIM-ASAP for Clothing and Textile suppliers.

UNIT LEVEL RFID-READY — Easily print Unit-level RFID tags for UID items and associate Unit RFID with Case RFID and Pallet RFID.

WAWF AUTOMATION — Automate the preparation of WAWF DD250 Receiving Reports, Invoices, Cost Vouchers and Progress Billings. Automate paper forms such as the DD1149, DD1348, SF1034, SF1443 and FAA8130 and dozens more. On-screen data entry helpers and data lookups make data entry simple.

ELECTRONIC CONTRACT RECEIPT — Electronically receive contract data for easy import into software for simplified and quicker order fulfillment, reduced data errors, and reduced data entry labor, Includes DoD eMail, DIBBS, and other DoD systems.

CONNECT TO OTHER SYSTEMS

UID MANAGEMENT SYSTEMS

Import UID Pedigree, part details and shipment information.

ERP & CONTRACT MANAGEMENT SYSTEMS

Import contract and shipment data to reduce data entry and potential data errors.

GOVERNMENT CONTRACTING SYSTEMS

Import contract and purchase order data from DoD eMall, DIBBS, and other systems.

RFID TRACKING SYSTEMS

Automatically associate cases to pallets and record shipment departure.

EXCHANGING DATA WITH OTHER SYSTEMS ELIMINATES WASTED DATA ENTRY, IMPROVES ACCURACY, AND REDUCES SHIPMENT DELAYS.

About Mil-Pac Technology: Mil-Pac Technology has been developing software for the very specialized requirements of defense contract packaging and shipping since its inception in 1982. It continues to develop and refine products that automate DD-Form processing, barcode label generation and support advanced electronic data interchange (EDI) applications for a variety of defense initiatives. Mil-Pac's integrated solutions for Wide-Area Workflow (WAWF), Radio Frequency Identification (RFID) and Unique Identifiers (UID) lead the industry for their ease of use and their impact on productivity.

Mil-Pac Technology offers a number of powerful, flexible software solutions currently in use by a wide range of defense companies from the very largest prime contractors to the very smallest subcontractors on which the defense industry depends.
